GARCIA DE MARINA | ARTIST STATEMENT

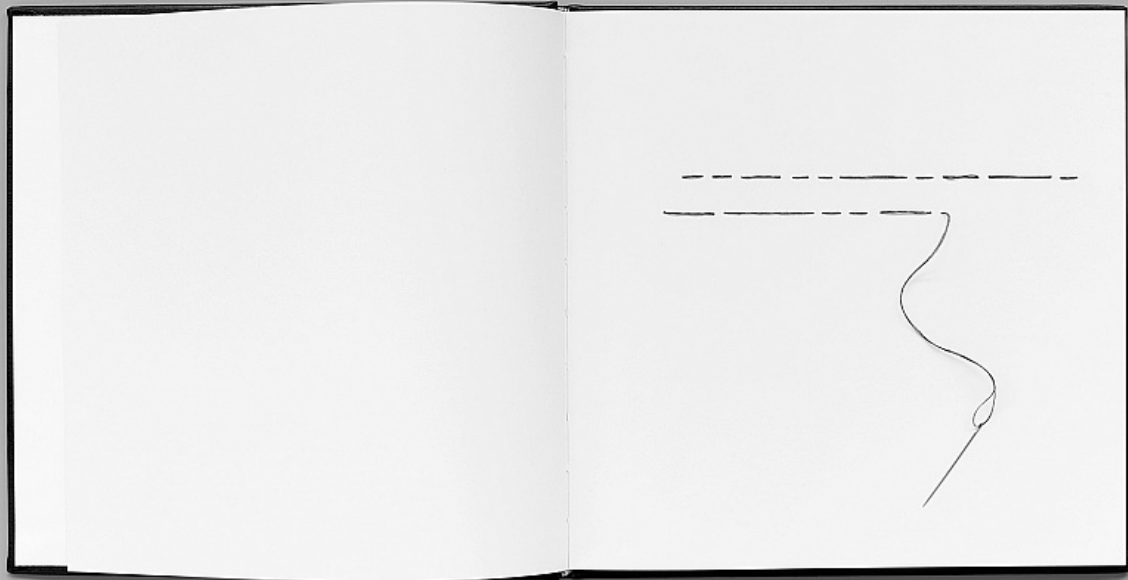

García de Marina was born in Spain in 1975. Since 2012 Garcia has used the everyday object in expressive ways to produce visually provoking photographs. His lens is profoundly irreverent with the real: it seeks to transform and stamp objects with new identities; it challenges the obvious, and pays heed to the grandeur of the everyday. The bareness of his photography endows objects with a leading role, while they are stripped of their essence to be reinvented without the intervention of any photographic manipulation on the images.

From the minimalist perspective, the inventiveness of his gaze lays claim to another reality. From observation we may create, from imagination we may innovate. Garcia is internationally recognised as having had solo and group shows in several countries around the world.
